

Consumer Complaint Intelligence Platform

SQL Analytics Report

Tools Used: Excel, Python, PostgreSQL, Power BI, Streamlit

Dataset Size: 62,516 Consumer Complaints (2017–2023)

1. Executive Summary

This project analyzes 62,516 consumer complaints related to financial products and services. The objective was to identify complaint trends, high-risk products, customer pain points, geographic hotspots, and operational performance indicators.

Key KPIs

Metric	Value
Total Complaints	62,516
Timely Response Rate	93.77%
Late Response Rate	3.84%
Product Categories	9
States Covered	51
Issue Categories	76

Key Findings

- Checking & Savings Accounts generated the highest complaint volume.
- Managing an Account was the most common customer issue.
- California accounted for the highest number of complaints.
- Complaint volume peaked in 2022.
- Web channel represented the primary complaint submission source.

2. Product & Customer Issue Analysis

Top Products by Complaint Volume

Product	Complaints	Share
Checking/Savings Account	24,814	39.69%
Credit Card/Prepaid Card	16,197	25.91%
Credit Reporting Services	7,710	12.33%

Insights

- Two product categories generated approximately 66% of all complaints.
- Checking and Savings Accounts represent the highest operational risk area.
- Credit Card products are the second-largest source of customer dissatisfaction.

Top Customer Issues

Issue	Complaints
Managing an Account	15,109
Purchase Statement Problems	4,415
Incorrect Credit Information	4,145

Business Impact

Account management processes and transaction-related activities are the primary drivers of customer complaints.

3. Geographic & Trend Analysis

Top Complaint States

State	Complaints
California	13,709
Florida	6,488
Texas	4,686
New York	4,442

Insights

- California contributes approximately 22% of total complaints.

- Large population states show the highest complaint concentration.
- Regional monitoring should focus on California, Florida, Texas, and New York.

Yearly Complaint Trend

Year Complaints

2017 5,394

2018 7,872

2019 7,075

2020 8,942

2021 11,149

2022 12,953

2023 9,131

Insights

- Complaints increased significantly between 2017 and 2022.
- 2022 recorded the highest complaint volume.
- 2023 showed a decline compared to the previous year.

4. Recommendations & Conclusion

Recommendations

Product Improvements

- Prioritize improvements in Checking and Savings Account services.
- Reduce friction in account opening, closing, and management processes.

Risk Management

- Strengthen fraud detection for Money Transfer Services.
- Improve credit reporting accuracy and dispute resolution workflows.

Operational Excellence

- Investigate delayed complaint responses.
- Increase support resources during high-volume quarters (Q2 and Q3).

Customer Experience

- Enhance digital self-service capabilities.
- Improve customer communication regarding account activities and disputes.

Conclusion

The analysis identified Checking and Savings Accounts as the primary source of complaints, with account management issues being the most common customer concern. California emerged as the highest complaint-generating state, while complaint volumes peaked in 2022. Although operational performance remains strong with a 93.77% timely response rate, targeted improvements in account servicing, fraud prevention, and customer communication can significantly enhance customer satisfaction and reduce future complaint volumes.
